

```

class Client {
  #login;
  #email;

  constructor(login, email) {
    this.#login = login;
    this.#email = email;
  }

  get userLogin() {
    return this.#login;
  }

  set newUserLogin(newLogin) {
    this.#login = newLogin;
  }

  get userEmail() {
    return this.#email;
  }

  set newUserEmail(newEmail) {
    this.#email = newEmail;
  }
}

const client = new Client("user", "user@gmail.com");

console.log(`Client login: ${client.userLogin}`);
console.log(`Client email: ${client.userEmail}`);

client.newUserLogin = "user1";
client.newUserEmail = "user1@gmail.com";

console.log(`Client login: ${client.userLogin}`);
console.log(`Client email: ${client.userEmail}`);

```

Client login: user	tasks.js:101
Client email: user@gmail.com	tasks.js:102
Client login: user1	tasks.js:107
Client email: user1@gmail.com	tasks.js:108
